

PROTECTION  
PAYS OFF!

WHAT'S ALL THE  
FUSS ABOUT?

**It has never been so Easy to  
Protect your Health and Save  
Costs at the same Time.**

[www.scat-europe.com](http://www.scat-europe.com)

Solvent vapours are not only the cause of many occupational illnesses and breakdowns: especially in instrumental analysis, malfunctions can be costly if they result in interruptions and maintenance work.

Safety Caps protect against hazards from solvent vapours and ensure clean, reliable analysis.

# HPLC-Supply

- ✓ Safe Extraction of Solvents
- ✓ Reliable Health Protection
- ✓ Trouble-Free Analytic
- ✓ Stable Eluents

# Do you Extract your Solvents Safely?

The consequences of **unsafe** extraction.

## Eluent emissions

Non-hermetically sealed containers are a considerable safety risk as eluents / solvents can escape into the laboratory air.

## Unstable mixtures

Solvents are volatile and evaporate already at room temperature. Solvent mixtures thus become unstable and change their mixing ratio - which in turn falsifies the result. Solvent filtration, accurately prepared eluents and a constant mixing ratio over the entire application time are a must, especially with UHPLC.

## Contamination of the eluent

Dust, dirt and impurities from the ambient air can contaminate the mobile phase - and have a disturbing effect on the chromatogram. A lot is invested in developing the method for a clean separation. Contamination can create overlapping peaks, and make it difficult to detect the substance you are looking for.

## Air in the HPLC

The results of your analyses are also affected by the handling of solvents. Tubes can slip out of the storage bottle if they are not screwed tightly. The consequence: aspirated air gets into the HPLC system and downtimes are pre-programmed.

## Handling chaos

With ordinary screw caps, handling when changing solvents is often awkward. Twisted capillaries create the famous "hose tangle" when the storage bottles have to be changed.

## You know This? Comparison

Open, unsealed bottles

Hermetically sealed bottles

# Safety Caps

## The Safety Standard for HPLC

## Safety Caps

### The Benefits at a Glance

#### ✓ Best possible Protection against Vapours

The hermetically sealing SCAT Safety Caps ensure that no solvent vapours escape.

#### ✓ Safe Pressure Equalisation

When extracting the eluent, a negative pressure is created in the container. The SCAT air valve ensures safe pressure equalisation during HPLC operation.

#### ✓ Clean Mobile Phase

The valve membrane of the air valve retains dust and dirt particles from the ambient air. Analysis results remain unaltered and reproducible. For clean separation without interfering or overlapping peaks in the chromatogram.

#### ✓ Stable Mixtures

Due to the closed system, your solvent mixtures remain stable. Individual components can no longer evaporate - the mixing ratio remains constant.

#### ✓ Analysis without Air Bubbles

Capillaries and tubes remain tightly screwed in and cannot slip out of the solvent. Interruptions due to air pockets are avoided.

#### ✓ Easy Container Change

The freely rotating cap can be easily removed even with the tubes fitted - without twisting or "tube tangle". Your storage containers are changed quickly and conveniently.

#### ✓ Safety for every HPLC Type

Whether HPLC, UHPLC or preparative HPLC: Safety Caps are optimised for all typical solvents and flow rates in chromatography. Each solution is extensively tested in practice before it finds its way into our range.

#### ✓ Best Chemical Resistance

Anyone who works with organic solvents knows how important it is to use chemically resistant materials. Therefore, we only use officially tested high-performance plastics with clearly defined and verifiable properties for the production.

#### ✓ Safely through the Audit

HPLC instruments with SCAT equipment pass any quality or safety test according to the latest safety standards. That is why the SCAT system is part of the basic equipment for laboratory safety at leading pharmaceutical and chemical companies worldwide.

#### ✓ Compatible across Generations

The valve and all other components are compatible with previous and future Safety Caps. No matter how your lab changes: Accessories and spare parts always fit. That is our promise for the future.

#### ✓ Trouble-Free Work

Safety Caps eliminate many interfering factors directly at the storage container. For smooth and reliable operation of your analytics.

#### ✓ More than 25 Years of Practice

For continuous improvement, we work closely with users from all over the world. Ideas from daily laboratory practice flow directly into every new generation of Safety Caps. This way, you always remain at the cutting-edge of technology.

## Safety Caps

### Functional Principle

#### Various thread sizes

Safety Caps are available in many thread sizes to fit your storage container. Bottles with thread GL 45 are the most common in the HPLC laboratory. Caps in other sizes can be found here:

GL 45 Thread..... starting from **page 44**

Further Thread Sizes..... starting from **page 50**

For Ground Neck Bottles..... **page 52**

Thread Adapters for further Threads .. starting from **page 164**

#### Which thread is the right one?

If you do not know the exact thread of your container, our chapter "Addendum" from "Thread Determination" onwards will help, on **page 172**.

# Safety Caps Technical Details

Install your capillaries easily! The appropriate installation wrench you will find on **page 169**.

Cut capillaries neatly! You will find the appropriate tool on **page 169**.

### Accessories included!

Fittings and blind plugs in every size are included in the scope of delivery.

**ID** 1.6 mm 2.3 mm 3.2 mm X

Accessories in detail from **page 150**

# Safety Caps

## GL 45 Thread

GL 45 is the most widely used thread for HPLC storage bottles. In most cases, bottles with a capacity of 500 or 1,000 ml are used. Solvents are often already supplied in bottles with this thread, or transferred to GL 45 bottles for HPLC supply.

### Thread information: GL 45

Informations to determinate threads starting from **page 172**.

Thread	Ø (mm) A	Ø (mm) B	(mm) C
GL 45	45.00	42.30	4.00

### Your benefits

- Great flexibility due to the maximum scope of delivery
- Fittings are colour coded according to inner diameter
- No annoying measuring of capillary sizes
- Unused connections can be closed with blind plugs

**A** 307 019

**B** 307 019-PP

### Accessories included!

Fittings and blind plugs in every size are included in the scope of delivery.

ID 1.6 mm 2.3 mm 3.2 mm X

Accessories in detail from **page 150**

**D** 160 501

Unused connections must be sealed with blind plugs!

### PP-Core

Our Safety Caps are available with a PP core on request. Here in the example: **B D**

Safety Caps with PP core are suitable for the analysis of polyfluorinated chemicals (PFC) according to DIN 38407-42 or 38414-14.

## Safety Caps The High-End-Model

 **GL 45**

### ✓ Quickly Ready for Use Again

Closing the shut-off ensures that no air gets into the capillaries or solvent runs out or drips when changing the container. After an interruption or repair, quick and easy flushing is possible.

### ✓ No Air Inclusions

After changing the storage reservoirs, the running analysis can be continued without interruption.

#### PFA Fitting

- One-Piece-Fitting
- Self-sealing connection of the capillaries
- No additional sealing cone / ferrule necessary

#### Shut-Off Valve (open)

- Trouble-free flow when open
- Quickly ready for use again after changing the container

#### PTFE Fitting

- Best chemical resistance

#### Eluent Flow Direction

- Towards the HPLC

#### Shut-Off Valve (sealed)

- Easy exchange of the container
- No air intakes in capillaries after changing storage containers
- Stops flow without coming into contact with capillaries

#### The Luer-adapter.

Easily add or remove liquids with the Luer adapter.  
More on **page 161**.

#### Looking for the right container?

Bottles, canisters and other containers, suitable with the SCAT Safety Caps starting from **page 130**.

## Safety Caps For Bottles with Ground Neck

 **NS 29/32**
**A** 107 607**B** 107 507**C** 307 508**D** 107 509**E** 107 506

### Easy Opening

Everyone is familiar with stuck ground neck stoppers: dried liquids and sticky substances settle on the ground glass, the stopper does not budge. SCAT stoppers with lock nut allow easy loosening and removal of the stopper even after a long standing time.

### Locknut

-  The locknut presses against the bottle when it is turned, thus releasing the cap without much effort

Fig.	Part No.	Description	Thread Size Ground Neck Size	Capillary Connection
<b>A</b>	<b>107 607</b>	Safety Cap II for ground neck bottles, with locknut	29/32 mm	2x

# Air Valves for Safety Caps

**PTFE-Filter**

- Keeps solvents clean

**Beak Valve**

- Blocks emission of solvent vapours
- Pressure equalisation when extracting the solvent
- Emergency opening in case of overpressure in the container

**UNF 1/4" 28G Thread**

- Fits all common Safety Caps

**Luer-Lock-Connection**

- Suitable for syringe filters
- e.g. for gassing solvents / connection of drying tubes

**Labelling Field**

- Simply turn the clip over and label it individually!

**Change Indicator**

- Rotatable change indicator for optimum visibility

**✓ Pretty SMART!**

**Simply turn it over and use the labelling field.**

Would you like to enter the expiry date for your valve yourself? No problem - simply turn the clip around and use the labelling field.

# HPLC Starter Kits

## Savings: up to 30%

### ✓ Plug & Play for 4 Storage Bottles

Save yourself the trouble of putting together a configuration! The Starter Kits are available in 3 versions, suitable for most HPLC applications.

### ✓ Suitable for all common HPLC Systems

The starter kits work independently of the manufacturer of your HPLC. The connections are designed for capillaries with 1.6, 2.3 and 3.2 mm outer diameter.

### ✓ Flexible Connections with Blind Plugs

If you do not need some connections, close them with the corresponding blind plugs. This way, there are no open spots.

### ✓ Price Advantage

Price advantage compared to single order. Compared to single Safety Caps, the set is significantly cheaper. Request your individual offer: [www.scat-europe.com](http://www.scat-europe.com)

# HPLC Supply Sets

## Plug-and-Play Solution

These combinations are most frequently used by our customers. That is why we have put them together as practical sets. They contain all the necessary parts for connecting the solvent supply to your HPLC.

### ✓ Completely - Ready for Immediate Use

- With Safety Cap for safe supply
- Storage bottle in different versions
- For each connection: 1.5 m capillary with 3.2 mm outer diameter
- Suction filter made of PTFE for a particularly clean mobile phase

### Accessories included!

Capillaries, suction filters, as well as fittings in every size and blind plugs are included in the scope of delivery.

### ✓ Various Combinations

With 1, 2 or 3 HPLC connections. The storage bottles are available in clear or brown glass, round or square.

## HPLC Supply Sets

### "Yutility" Bottle

With colour coding to identify your laboratory bottle. The coloured ring is easy to remove even when wearing gloves.

# HPLC Supply and Waste Set

## The All Inclusive Package

- ✓ Complete Package: All Parts Included
- ✓ Suitable for HPLC / UHPLC - Systems
- ✓ With Storage Bottle and Waste Container
- ✓ Unbox, Install - Ready

### The complete package for many device types

The HPLC supply and waste set offers complete safety for your HPLC or UHPLC system. It is ideal as basic equipment for most chromatography instruments and was developed in cooperation with leading instrument manufacturers. The large scope of delivery is designed for devices with up to 4 storage bottles and one waste container.

### Closed system for optimal protection

From the supply to your HPLC to the waste: air valves and exhaust filters block solvent vapours where they arise. The circulation of the liquids remains safe. Unused connections must be sealed with the supplied blind plugs. This way, there are no open spots.

### Scope of delivery: what is included?

A detailed overview of all included parts can be found on **page 60**.

## HPLC Supply and Waste Set

### The All Inclusive Package

#### Safe Supply

- 4 Safety Caps with air valve
- For clean and safe extraction of the eluents
- 3 Connections for capillaries with  $\varnothing$  1.6 / 2.3 / 3.2 mm outer diameter at each cap
- Blind plugs for unused connections included

#### 4 Storage Bottles Included

- 1 Litre capacity with each bottle
- Clear glass with scale
- GL 45 Thread

#### Safe Disposal

- Safety Waste Cap blocks solvent vapours at the disposal
- Exhaust filter size M (6 months lifetime)
- Various filter sizes you will find on **page 71**

#### Collecting Canister Included

- 5 Litre capacity
- Chemical resistant PE-HD
- GL 45 Thread
- Various canisters in different sizes you will find starting from **page 136**
